

Read Me Notes: Rainbow

October 2006

Home Page template

This template works best with regular landscape oriented photos. Thinner portrait oriented photos are not recommended for use with this template as they may not fill the inside area of the top circular frame that sits on top of the masthead (leaving an empty area inside of the frame). The top circle is a slideshow. The other two circles are frames for the second two thumbnails in your album. These photos may need to be repositioned and resized if they are not already centered within the circular frame (this will vary depending on the size and aspect of your original imported photos). This template is not suited for a Group album page (use the *Group Page* template for your Group albums).

Tip: use the thumbnail zoom tool in the ImageWell edit window to zoom in on the thumbnails for a nice touch.

Page in Group template

This template displays only one thumbnail. Clicking the thumbnail will open a slideshow that shows all of the photos in your album.

Group Albums

Do not use the following templates on group albums – *Home Page*, *Collage & Text*, and *Slideshow Only*. Group albums automatically click through to the sub-album pages contained within the group. Therefore anything with a slideshow on the same page will not work with a group, as groups do not connect directly to slideshows.

Slideshow Only template

This template is designed for one line of caption text only. If you have more than one line, you will need to move the caption box up until you can view all lines of the caption (the caption text is white and hence it will not show up against a white background; as well, it will overlap the slideshow control buttons if it is too lengthy).
